VINAY KUMAR

Electronics & Communication Engineering

Ghaziabad, Uttar Pradesh ☎ +91 8601317580 ✉ vinay55ti@gmail.com
LinkedIn GitHub Portfolio

SUMMARY

B. Tech Electronics & Communication Engineering student at ABES Engineering College with hands-on experience in MERN-stack development, REST APIs, and hardware-based systems. Built 5+ projects across healthcare, web development, and embedded systems, and solved 100+ Data Structures & Algorithms problems. Completed an AI Automation & Intelligent Solutions internship through IBM SkillsBuild.

EDUCATION

ABES Engineering College, Ghaziabad *2024 – 2028 (Expected)*
B. Tech in Electronics & Communication Engineering

D.S.S. School, Deoria *2022 – 2023*
Senior Secondary (12th Grade), PCM — 63.2%

D.S.S. School, Deoria *2021 – 2022*
Secondary (10th Grade) — 84%

TECHNICAL SKILLS

Languages: C/C++, Java, JavaScript, TypeScript
Web: React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, Tailwind CSS, REST APIs
Tools & Engineering: Git/GitHub, Arduino, Vivado (FPGA), MATLAB, LTspice
Core: Data Structures & Algorithms, Embedded Systems

EXPERIENCE

BharatCares® *June 2026 – July 2026*
AI Automation & Intelligent Solutions Intern

- Completed a 6-week internship through IBM SkillsBuild focused on AI automation and intelligent solutions
- Applied AI automation concepts to intelligent solution workflows during the internship

PROJECTS

Health ID – QR-based Emergency Medical ID *MERN Stack*

- Built a **MERN stack** platform for **100+** users enabling secure medical registration and QR code retrieval.
- Designed a first-responder workflow to retrieve critical patient information instantly

Personal Portfolio Website *React.js, TypeScript, Tailwind CSS*

- Developed a responsive portfolio website using React.js, TypeScript, and Tailwind CSS
- Built reusable frontend components including navigation, project cards, and a contact form

Mata Vaishno Devi Devotional Website *MERN Stack*

- Developed a devotional website with 5+ responsive pages for pilgrims using the MERN stack
- Implemented responsive UI components and content pages for an accessible user experience

Electronic Voting Machine *Arduino, C/C++*

- Built a hardware-based voting machine using Arduino, switches, jumper wires, breadboard, and a display module
- Implemented vote-counting and result-display logic for an Arduino-based EVM using C/C++.

ACHIEVEMENTS & CERTIFICATIONS

- Led completion of FPGA hardware digital design training via HDL and schematics (Pine, Feb 2026)
- Solved 100+ Data Structures & Algorithms problems, strengthening problem-solving and algorithmic thinking
- Contributed to 1 AI Story Maker web application during Mission Upskills India Techfest (ABES Edition), GUVI
- Received a Certificate of Participation for contributing to GUVI Day at the Mission Upskills India Techfest, ABES Edition.
