# VINAY KUMAR

vinay55ti@gmail.com || **+91 8601317580** || LinkedIn || Portfolio || Github || **Ghaziabad(UP)**

## SUMMARY

Third-year B.Tech ECE student at ABES Engineering College with hands-on experience in MERN-stack development, React Native, REST APIs, and database management. Skilled in Java, JavaScript, and TypeScript, with knowledge of FPGA design and embedded systems. Solved 150+ DSA problems and participated in 5+ hackathons.

## EDUCATION

**ABES Engineering College, Ghaziabad** 2024 – 2028 (Expected)
B. Tech in Electronics & Communication Engineering

**D.S.S. School, Deoria** 2022 – 2023
Senior Secondary (12th Grade), PCM — 63.2%

**D.S.S. School, Deoria** 2021 – 2022
Secondary (10th Grade) — 84%

## TECHNICAL SKILLS

**Languages:** C/C++, Java, JavaScript, TypeScript
**Frontend:** React.js, React Native, HTML5, CSS3, Tailwind CSS
**Backend:** Node.js, Express.js, REST APIs
**Database:** MongoDB, PostgreSQL, MySQL
**Tools & Engineering:** Git/GitHub, Arduino, Vivado (FPGA), MATLAB, LTspice
**Core:** Data Structures & Algorithms, Embedded Systems

## EXPERIENCE

**BharatCares®** June 2026 – July 2026
AI Automation & Intelligent Solutions Intern

- Completed a 6-week internship through IBM SkillsBuild focused on AI automation and intelligent solutions
- Applied AI automation concepts to intelligent solution workflows during the internship

## PROJECTS

**Health ID – QR-based Emergency Medical ID** MERN Stack

- Built a **MERN stack** platform for **100+** users enabling secure medical registration and QR code retrieval.
- Designed a first-responder workflow to retrieve critical patient information instantly

**Padhlo – Student Notes & Learning App** MERN Stack

- Developed an Android student learning app using React Native and Expo with user authentication and branch/year-based access.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB to manage student data and study materials.

**Electronic Voting Machine** Arduino, C/C++

- Built a hardware-based voting machine using Arduino, switches, jumper wires, breadboard, and a display module
- Implemented vote-counting and result-display logic for an Arduino-based EVM using C/C++.

## ACHIEVEMENT & TECHNICAL TRANING

- Completed hands-on FPGA digital design training at Pine, applying HDL and schematic-based design techniques (Feb 2026).
- Participated in 5+ hackathons, developing technical solutions through teamwork and collaborative problem-solving
